

LOCK with DOUBLE-BIT KEY

+ Service **CYLINDER** Yale type

+ High security euro profile
CYLINDER

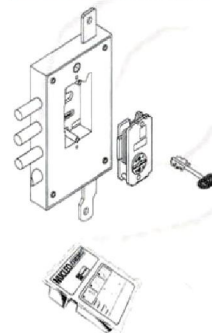

TECHNICAL NOTES "on the lock"

MOTTURA lock with interchangeable nucleo "COMPACT"

They are a range of innovating double bit locks found to satisfy the different needs of security. The complete range has been created in order to reach the highest level of security with the double bit key lock.

The nucleo can be simply removed at any time in order to obtain a new locking system with a new code and different keys from the previous one.

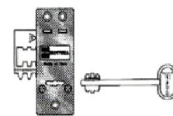

Lock complete of n.1 steel "Compact" nucleo with 3 keys (length of 50 mm) sealed package

The advantages are the following:

- to have a new locking system in a few minutes, without replacing all the lock and remove the leaf, but simply working under the backplate on the internal side of the door.
- protection of the keys, which are supplied with the interchangeable nucleo in a sealed package
- deadbolts outlet length of 36 mm, with only two turns of the key (instead of four ones)
- the gorges pack is manufactured with antideco device to protect the lock from professional burglars
- very small double bit key (safe type)

Temporary plastic nucleo

The above mentioned locks are suited to be installed on building yards, infact they can be provided with a plastic nucleo and a service key able to open all the plastic nucleo allowing all the workers to enter and work in the flats. When the works are ended, each plastic nucleo has to be replaced with the steel one complete of a new set of keys supplied in the sealed package.
